

“Baby Stages – A Parent’s and Caregiver’s Guide to the Social and Emotional Development of Infants and Toddlers”

Tips for new parents and child caregivers comes in the form of a handy “wheel.”

The Michigan Association for Infant Mental Health (MI-AIMH), the Michigan Department of Community Health and Michigan State University Extension have created a “wheel” that can steer parents and those working with infants and families through the critical first years! Easy to read and user friendly, parents and caregivers can follow an infant’s progress around the wheel until he or she is three years old. With just a ‘turn of the dial’ a caring adult will discover many things he or she can do to nurture a strong relationship and support healthy social and emotional development in the first years. **Why is this important?** Research demonstrates that healthy social and emotional development is strongly connected to important developmental outcomes and success in school.

Baby Stages has multiple uses – as a gift for new parents, as a tool for early childhood staff or to teach professionals in child welfare and mental health about social and emotional development in the first years. If you would like to order one or multiple copies of **Baby Stages**, please contact us at 734-785-7700, Ext. 7194, or e-mail: dkahraman@guidance-center.org or check out the web site at www.mi-aimh.msu.edu.

- Clear and easy to read!
- Based on research and best practice
- Practical tips for each stage of development from birth through 36 months
- Give to friends, families, colleagues and clients.
